day3 WIRELESS

day3 WIRELESS is state-of-the-art point to point Internet access for users of the Internet. Not to be confused with 'hotspot' wireless, eg, 802.11b/g day3 WIRELESS (5.8 and 5.3 GHz) is the next generation WAN solution for business serious about performance and price.

day3 WIRELESS will provide your business with remarkable dedicated speeds, high quality and robust throughput with up to 10 Mbps sustained throughput over distance (55km+) and burstable speeds for lightning fast performance.

Each day3 WIRELESS plan comes bundled with data, CPE hardware (Client Subscriber Unit), a static IP address and SLA's. An installation fee and optional hardware router are the only other costs to consider to get started.

When you compare our WIRELESS plans you'll discover they beat traditional broadband performance and prices time and time again!
